

Profile: Dreams of Bangladesh Company

"Where Innovation Begins, INNOVATING Locally, IMPACTING Globally."

Dreams of Bangladesh

Introduction

Welcome to Dreams of Bangladesh, where innovation begins, and together we innovate locally to make a global impact. Founded from a passion for science and technology, Dreams of Bangladesh has evolved into a powerhouse of creativity and engineering excellence. Under the visionary leadership of Mahadir Islam and the strategic guidance of Md Moin Uddin, our journey began in 2017, rooted in the curiosity and enthusiasm of young innovators eager to make a difference.

Dreams of Bangladesh officially took shape on August 2, 2022, when a dedicated team of multi-talented individuals from various institutions united with a shared vision. Our mission is to represent Bangladesh on the global stage, showcasing our technological prowess and contributing to a smarter, more connected world.

Our achievements are a testament to our relentless pursuit of excellence. Starting from institution-level competitions, we steadily advanced through upazilla, district, and division levels, ultimately achieving national recognition. Our efforts have propelled us onto the international stage, where we have proudly represented Bangladesh, earning prestigious accolades, including gold medals in renowned competitions. These milestones reflect our resilience, skill, and the power of collective effort.

Dreams of Bangladesh offers a wide array of services designed to drive technological advancement and foster innovation. Our services include: Robotics and Automation Solutions, Educational Workshops and Seminars, Research and Development, Consultancy Services, Custom Robotics Projects.

Our team is the heart of Dreams of Bangladesh. With over 40+ exceptionally talented individuals, including more than 20+ active members, we are a diverse and dynamic group united by our passion for innovation. Our team members are not just brilliant and dedicated; they are multi-talented, excelling in various fields and bringing a wealth of expertise to our projects. Their innovative thinking and unwavering dedication are the driving forces behind our success.

At Dreams of Bangladesh, we believe in the trans-formative power of technology. Our mission goes beyond technological advancement; it is about creating a significant impact on society. We are committed to bridging the digital divide, ensuring that technological literacy and empowerment reach every corner of Bangladesh. By fostering a culture of innovation, we aim to inspire and nurture the next generation of tech leaders and entrepreneurs, driving economic growth and social development.

Our initiatives span a wide array of sectors, including education, healthcare, agriculture, and sustainable development, aligning with the UN Sustainable Development Goals. We are dedicated to developing ethical and sustainable technologies that address pressing global challenges and improve the quality of life for all. We conduct seminars and workshops in educational institutions, bringing technology closer to students and encouraging them to explore and innovate.

Dreams of Bangladesh is built on collaboration and partnership. We have forged strategic alliances with international organizations and participated in numerous knowledge exchange programs, enriching our expertise and expanding our horizons. Our commitment to continuous learning and adaptation ensures that we remain at the forefront of technological advancements, ready to tackle the challenges of tomorrow.

Our slogan, "Where Innovation Begins, INNOVATING Locally, IMPACTING Globally," encapsulates our vision and mission. We are not just about technology; we are about using technology to make a positive impact on the world. We aim to connect rural and urban populations with technology, ensuring that everyone, regardless of their location, has the opportunity to learn, innovate, and contribute.

Dreams of Bangladesh invites you to join us on this trans-formative journey. Together, we will forge a future where innovation knows no bounds, technology empowers every individual, and Bangladesh stands tall as a beacon of progress and excellence on the global stage. Welcome to a world where dreams are realized through innovation, dedication, and collective effort. Welcome to Dreams of Bangladesh.

Mission and Vision

Mission:

1. Develop Cutting-Edge Technology Solutions:
 - o Create groundbreaking technological solutions that address the most pressing challenges faced by Bangladeshi communities, enhancing lives and livelihoods.
2. Foster a Culture of Innovation:
 - o Cultivate a spirit of innovation and excellence among team members and the broader community, encouraging robust research, development, and participation in both national and international arenas.
3. Empower Through Education and Training:
 - o Provide comprehensive education and training opportunities in technology and robotics to students across Bangladesh through seminars, workshops, and practical sessions.
4. Bridge the Digital Divide:
 - o Extend technological opportunities to rural and underserved communities, ensuring that technology and digital enlightenment reach the most remote areas.
5. Collaborate and Exchange Knowledge:
 - o Build strong partnerships with international organizations, companies, and educational institutions, facilitating knowledge exchange programs to stay at the forefront of technological advancements.
6. Promote Ethical Robotics:
 - o Develop and deploy robotics solutions adhering to strict ethical guidelines and principles, ensuring that our technological advancements contribute positively to society and the environment.

Vision:

1. Revolutionize Industries:
 - o Utilize disruptive technologies to transform key industries such as agriculture, healthcare, and education, implementing solutions that increase efficiency, productivity, and sustainability.
2. Empower Individuals:
 - o Enable individuals to reach their full potential through access to cutting-edge technologies, providing tools and opportunities for personal and professional growth in the tech sector.

+8801734-732595

9/25, Block C, Humayun Road,
Mohammadpur, Dhaka-1207

3. Position Bangladesh as a Global Leader:
 - Elevate Bangladesh to a leading position in the global technological landscape, showcasing the nation's capabilities and achievements in robotics and innovation on international stages.
4. Achieve Smart Bangladesh by 2041:
 - Contribute significantly to the national goal of creating a Smart Bangladesh by 2041, integrating advanced technologies into various sectors to enhance quality of life and economic development.
5. Promote Sustainable Development Goals (SDGs):
 - Align our initiatives with the UN Sustainable Development Goals, particularly SDG 9 (Industry, Innovation, and Infrastructure) and SDG 11 (Sustainable Cities and Communities), developing technologies that contribute to sustainable development and environmental conservation.
6. Enhance Technological Literacy:
 - Increase technological literacy across all age groups and communities, creating awareness and understanding of the importance of technology in modern life.
7. Support Talent and Entrepreneurship:
 - Foster a thriving ecosystem for tech talent and entrepreneurs, offering mentorship, resources, and opportunities to innovate and create impactful solutions.
8. Advance Ethical and Sustainable Robotics:
 - Lead the development of ethical and sustainable robotics, ensuring our technological advancements benefit society and the environment.
9. Expand Global Collaborations:
 - Strengthen international collaborations, leveraging global expertise to enhance our technological capabilities and broaden our impact.
10. Drive Social Impact:
 - Use technology as a force for good, addressing social challenges, promoting inclusivity, and improving the quality of life for all citizens.

Projects and Innovations

1. BengalNav: Obstacle Avoiding Robot

A robot designed to navigate complex environments, avoiding obstacles with precision, symbolizing resilience and adaptability.

2. DeltaPath: Line Follower Robot

A robot that follows designated paths with high accuracy, representing the steady progress of Bangladesh's technological advancements.

3. BengalBlitz: Soccer Robot

An agile and precise robot built for robotic soccer matches, showcasing the spirit of teamwork and competition.

4. SundarScan: Ultrasonic Radar

An innovative radar system utilizing ultrasonic waves to detect objects and map surroundings, inspired by the Sundarbans' rich biodiversity.

5. AgroNova Series (Versions 1-7)

A series of agricultural robots designed for various farming tasks, enhancing productivity and efficiency in Bangladesh's agricultural sector.

6. CovidGuard: COVID Prevention System

An integrated system using robotics to enforce social distancing, monitor health parameters, and sanitize environments, ensuring safety during the pandemic.

7. AquaPal: Aquatic Friendly Robot

A robot designed for underwater tasks, promoting sustainability and assisting in aquatic research, reflecting Bangladesh's connection with water bodies.

8. CareBot: Helping Robot

A versatile robot developed to assist with daily tasks, providing aid to the elderly and differently-abled, embodying the spirit of care and service.

9. FireSentinel: Firefighter Robot

An advanced robot capable of detecting and extinguishing fires, ensuring safety in hazardous environments, named after the guardian spirit of fire.

10. AgriSense: Advanced IoT Farming System

A cutting-edge farming system using IoT devices to monitor and manage agricultural activities, ensuring optimal crop yield and resource usage.

11. SensorMatrix: 20 Types of Sensors Project

A comprehensive project showcasing various sensor technologies and their applications in robotics and automation, symbolizing the power of innovation.

12. LearnBot: Machine Learning Using Robot

A robot that utilizes machine learning algorithms to adapt and improve its functions, representing continuous learning and growth.

+8801746-342152
+8801734-732595

9/25, Block C, Humayun Road,
Mohammadpur, Dhaka-1207

13. IntelliBot: AI Robot

A highly intelligent robot powered by artificial intelligence, capable of performing complex tasks and making autonomous decisions.

14. SpringBot: Vernalization System Robot

The first robot in the Asia Pacific designed to implement vernalization, a process crucial for certain crops' growth, reflecting the arrival of spring.

15. RiverGuard: River Cleaning AI Automatic Robot

An autonomous robot using AI to clean and maintain river environments, promoting sustainability and environmental health.

16. SkyHex: Advanced HEXAcopter

A sophisticated hexacopter drone designed for aerial surveillance, mapping, and environmental monitoring.

17. SkyRover: Advanced Drone

A versatile and high-performance drone for various applications, including surveillance, delivery, and research, symbolizing the sky traveler.

18. SnowBlitz: Snow Removal Drone

A drone specifically designed to remove snow efficiently from large areas, equipped with advanced snow-blasting technology.

19. FrostBot: Snow Removal Robot

A ground-based robot engineered to clear snow from roads and walkways, ensuring safe and accessible paths during winter.

20. MarsRover: Mars Rover

A robust rover developed for exploring and conducting research on Mars, equipped with advanced navigation and scientific instruments.

21. MarsAgroBot: Mars Agriculture Robot

A pioneering robot designed to support agricultural activities on Mars, aiding in the cultivation of crops in extraterrestrial environments.

Ideas About Smart Agriculture

1. FishTech: Aquaculture Enhancement Devices

Increasing the use of devices capable of assisting fish farming and testing water quality in ponds to ensure optimal conditions for aquaculture.

2. CropTech: IoT-Enhanced Farming

Application of IoT and sensors for precise application of fertilizers, irrigation, and pesticides, enhancing the production of high-value fruits and crops.

3. SprayDrone: Pesticide Application Drones

Use of drones to safely and efficiently spray pesticides, reducing the labor and risk associated with human application.

4. AgriAI: AI-Driven Crop Management

AI-driven crop and variety selection, and intermanagement system to adapt to climate and weather changes for optimal agricultural outcomes.

5. HarvestBot: Automated Harvesting

Robots designed to address labor shortages during harvest, ensuring timely and efficient collection of crops.

6. AutoFeeder: Smart Fish Feeders

Automated fish feeders for pond farming, providing consistent and optimal feeding schedules to improve fish growth and health.

7. FertiLink: Digital Fertilizer Distribution

Digitizing fertilizer distribution to ensure farmers receive fertilizers at the right time and price, reducing delays and harassment.

9/25, Block C, Humayun Road,
Mohammadpur, Dhaka-1207

8. CropChain: Blockchain for Fair Pricing

Using blockchain technology to ensure fair pricing of crops from producer to consumer, allowing transparency and fairness in the agricultural market.

9. AgriMarket: Agricultural Marketing App

Development of an app for marketing of agriculturally produced goods, connecting farmers and consumers across the country for easy buying and selling.

10. SafeAgri: Precision Agriculture

Precision agriculture aiming for safe food production by applying the necessary amount of pesticides, fertilizers, and irrigation, utilizing AI.

11. PestiReg: Regulated Pesticide Sales

Ensuring the sale and purchase of pesticides according to existing laws, promoting safe and regulated use.

12. AquaSmart: IoT for Aquaculture

Making IoT-based smart devices available for aquaculture fish farming in Bangladesh, improving efficiency and productivity.

13. DroneAgri: Smart Drone Systems

Agricultural technology based on a smart drone system, enhancing farming practices and monitoring.

Plan: Safe Bangladesh

1. PeaceBot: Advanced Surveillance and Response Robot

Creating a Bangladesh free from riots and social disorders through advanced surveillance and response robots, ensuring peace and stability.

2. E-VoteGuard: Smart E-Election System

Implementing smart e-election systems using artificial intelligence to ensure fair and transparent elections, promoting democracy and integrity.

3. BloodLink: Smart Blood Bank and Donor Management System

Developing a smart blood bank and donor management system to streamline the process of blood donation and distribution, enhancing healthcare efficiency.

4. RailPower: Renewable Energy from Railway Lines

Innovating power generation from railway lines, utilizing the movement of trains to produce renewable energy, contributing to sustainable development.

Comprehensive Services Portfolio

1. Global Robotics Engagement and Partnership Opportunities

Description:

Facilitates exceptional opportunities for team members to engage in international robotics competitions, gain admission to prestigious global university programs, present at highly regarded research paper conferences, and collaborate with leading international organizations and corporations. Designed to elevate expertise, foster global partnerships, and bring cutting-edge innovations to Bangladesh.

2. Robotics Research and Innovation Center

Description:

Dedicated to advancing robotics technology through pioneering research and development. Focuses on creating innovative solutions to address industry-specific challenges, ensuring a leading position in technological progress.

3. STEM Educational Robotics Programs

Description:

Delivers comprehensive STEM educational programs designed to ignite interest and build foundational skills in robotics. Includes interactive workshops, detailed seminars, and hands-on training tailored for educational institutions.

4. Integrated Robotics, Automation Consultancy, and IoT Solutions

Description:

Offers a comprehensive suite of services designed to optimize operations, enhance productivity, and improve efficiency through bespoke robotics solutions, intelligent systems integration, and expert consultancy. Specializes in strategic planning, implementation support, and ongoing management for robotics and automation projects.

5. Robotics Competitions and Event Management

Description:

Organizes and participates in national and international robotics competitions and events, fostering innovation, collaboration, and community engagement within the robotics sector.

6. Comprehensive Robotics Maintenance and Support

Description:

Provides thorough maintenance and support services for robotics systems to ensure longevity and optimal performance. Includes regular maintenance, troubleshooting, and repair services.

7. Advanced AI and Machine Learning Robotics Integration

Description: Integrates advanced AI and machine learning algorithms into robotics systems to enhance their capabilities and enable complex, autonomous functions.

8. Tailored Robotics Software Development

Description:

Offers bespoke software development services for robotics systems, including control software, automation scripts, and user interfaces, designed to optimize performance and functionality.

9. Website Design and Development

Description:

Provides expert website design and development services for businesses and organizations in the robotics and technology sectors. Focuses on creating functional, visually appealing websites that enhance user experience and engagement.

10. Research Paper Creation and Publishing Support

Description:

Supports researchers and students in crafting, editing, and publishing high-quality research papers in robotics and related fields, ensuring professional presentation and reach to the relevant academic audience.

11. Robotics Product Retail and Distribution

Description:

Manages a comprehensive retail and distribution network for robotics products, including components, kits, and fully assembled robots, ensuring high-quality products and reliable service.

12. Thesis and Final Year Project Support Program

Description:

Provides extensive support for students working on their thesis or final year projects in robotics, including mentorship, access to resources, and technical guidance to help achieve academic goals.

13. Robotics Product Rental and Leasing Services

Description: Offers flexible rental and leasing services for a wide range of robotics products and related equipment, providing a cost-effective solution for short-term projects, demonstrations, or events.

14. Professional Training, Development, and Laboratory Facilities

Description: Prioritizes skill enhancement and practical experience through comprehensive training programs, hands-on workshops, and state-of-the-art laboratory facilities. Includes professional training and development programs, practical sessions, and workshops designed to build and enhance skills in robotics and automation.

15. Advanced 3D Printing Services

Description: Provides cutting-edge 3D printing services for rapid prototyping and manufacturing of custom parts and components for robotics systems. Capabilities include precise, high-quality production with quick turnaround times.

Specialized Departments

1. Robotics Maintenance and Support Division

Description: This division is dedicated to developing and implementing comprehensive maintenance robots designed for routine inspections, preventive maintenance, and emergency repairs. It ensures the continual functionality and safety of robotic systems across various industries, including manufacturing, logistics, and infrastructure. The division provides services such as system diagnostics, repair scheduling, and upgrades to enhance the longevity and performance of robotics systems.

2. Healthcare Robotics Division

Description: Specializes in the creation and deployment of advanced robotic solutions tailored to the healthcare sector. This division focuses on developing robotic assistants for patient care, such as robotic surgery systems that enhance precision in surgical procedures, and rehabilitation robots designed to support physical therapy and recovery. The division also works on integrating robotics into medical workflows to improve patient outcomes, support healthcare professionals, and streamline medical processes.

+8801734-732595

9/25, Block C, Humayun Road,
Mohammadpur, Dhaka-1207

3. Agricultural Robotics Division

Description:

This division focuses on designing robotics solutions that enhance agricultural productivity and sustainability. It includes the development of automated systems for planting, harvesting, and crop monitoring, such as drones for aerial crop assessments and robotic systems for precision agriculture. The division aims to address challenges in farming by providing tools that optimize resource use, increase yield, and reduce manual labor.

4. Environmental and River Robotics Division

Description:

Dedicated to creating robotics solutions for environmental conservation and river-related applications. This division develops technologies for monitoring and managing environmental conditions, such as pollution detection sensors and water quality assessment tools. It also focuses on river management systems that address issues like sedimentation and aquatic ecosystem health, contributing to environmental protection and resource management.

5. Smart City Solutions Division

Description:

Integrates robotics and IoT technologies to develop innovative solutions for smart cities. This division works on projects such as intelligent traffic management systems that optimize traffic flow and reduce congestion, and autonomous public transportation systems that enhance urban mobility. The division aims to create interconnected, efficient urban environments that improve the quality of life for city residents and promote sustainable living.

6. Renewable Energy Robotics Division

Description:

Focuses on developing robotics solutions that support the renewable energy sector. This division works on enhancing the efficiency and maintenance of renewable energy systems, including solar panels, wind turbines, and hydroelectric generators. It develops robots for routine inspections, cleaning, and repair tasks, ensuring optimal performance and longevity of renewable energy assets.

7. Automation of Traditional Industries Division

Description:

This division is dedicated to modernizing traditional industries through automation and robotics. It focuses on integrating robotic systems into sectors such as textiles, jute, and leather, to enhance production processes, improve efficiency, and

reduce manual labor. The division aims to transform traditional manufacturing methods, driving innovation and increasing competitiveness.

8. Disaster Response Robotics Division

Description:

Develops advanced robotic solutions for disaster response and recovery. This division focuses on creating robots capable of performing search and rescue operations in hazardous environments, such as collapsed buildings or disaster zones. It includes developing robots equipped with sensors for detecting survivors, mapping disaster areas, and providing situational awareness to emergency responders.

9. Robotics for Public Safety Division

Description:

Creates robotic solutions designed to enhance public safety and security. This division develops systems for surveillance, emergency response, and law enforcement, including robots equipped with cameras and sensors for monitoring public spaces and responding to incidents. The division aims to support safety operations and provide advanced tools for security personnel.

10. Sustainable Development and Green Robotics Division

Description:

Focuses on developing robotics solutions that promote sustainable development and environmental conservation. This division works on projects such as eco-friendly manufacturing processes, waste management systems, and technologies that reduce the environmental impact of robotics operations. It aims to integrate green practices into robotics technology to support sustainability and environmental stewardship.

Achievements

National:

1. Runner up- Bangabandhu Creative Talent Hunt-2022, National Round
2. Champion- Notre Dame annual science festival -2021
3. Champion- 43th National Science & Technology Week Upazilla Round
4. Champion- 43th National Science & Technology Week District Round
5. Champion- Bangabandhu Creative Talent Hunt-2022, Upazilla Round
6. Champion- Bangabandhu Creative Talent Hunt-2022, District Round
7. Champion- Bangabandhu Creative Talent Hunt-2022, Divisional Round
8. Champion- ASSAD & BFF science festival-2021
9. Champion- Divisional Programming Contest-2022
10. Champion (Agriculture category)- Smart Bangladesh Project Submission Brahmanbaria District 2023
11. Student of the year-2022(Tech)- Robo Tecg Valley
12. Champion- 16th December GK Olympiad, Brahmanbaria, 2022
13. Champion- 07th March Story Writing, Dhaka University, 2022
14. Champion- International Skill innovation fest-2024, IUT, OIC,2024
15. Champion- Notre Dame annual science festival -2023
16. Champion- 45th Science & Technology Week

International:

1. Gold Medalist-World Invention Competition & Exhibition, Malaysia, 2023
2. World Rank 4th- World Robotics Championships, International Round, New Delhi, India, 2022
3. FINALIST TOP 10- ROBOFEST, UAE (Online), 2021
4. 5th Place Innovation Challenge- World Robotics Championships, International Round, New Delhi, India, 2022
5. 4th place Robo Soccer- World Robotics Championships, International Round, New Delhi, India, 2022
6. Technical Medalist- Codeavour International Dubai, Bangladesh Regional Round
7. Agri tech Research paper Granted- East London University, London, 2023
8. TOP Listed research paper and published in international Journal (Agri & Ai Tech)- 11th International Conference on informatics, Electronics & Vision (ICIEV), London, 2023
9. Best International project Award- WICE, Mahsa University, Malaysia, 2023
10. Best international team & Science club Award- WICE, Bach khoa Science & Math Club, Malaysia, 2023
11. Research paper granted (Michigan University, America)

International:

1. WORLD ROBOTICS CHAMPIONSHIP-2022, New Delhi, India Place: 4th within 53 countries
2. 5th World Invention Competition and Exhibition-2023, Malaysia Award: i) Champion and gold medalist in IT & Robotics Category within 19 countries ii) Got Best project award IN this competition within 401 projects for AGRICULTURAL ROBOT. iii) GOT "BACH KHOA SCIENCE AND MATH CLUB SPECIAL AWARD" for best team in this competition
- 3) 6th World Invention Competition and Exhibition-2023, Malaysia Award: i) Champion and gold medalist in IT & Robotics Category.
- 4) Ranked Top 10 in NASA Human Exploration Rover Challenge (HERC)
- 5) Successfully organized the 7th WICE National Competition in Bangladesh and advanced to the international round in Indonesia with 17 teams, all awarded medals
- 6) Participated RoboSub 2025 and secured global ranking.

Conclusion

As we stand on the cusp of a technological revolution, Dreams of Bangladesh represents a bold vision for the future—a future where Bangladesh not only participates in the global technology arena but leads it with distinction. From our humble beginnings in 2018, driven by the indomitable spirit of Mahadir Islam and the strategic guidance of Md Moin Uddin, we have evolved into a dynamic force poised to make an indelible mark on the world stage.

Our journey, which began with a passion for science and technology, has been characterized by innovation, perseverance, and a relentless pursuit of excellence. In just two years since our official launch on August 2, 2022, we have achieved remarkable milestones that reflect our commitment to transforming Bangladesh into a global hub for technological advancement. Through participation in prestigious national and international competitions, the presentation of groundbreaking research papers at renowned universities, and the successful organization of high-profile events in Canada, we have demonstrated our capacity to lead and inspire.

Our team, a collective of over 40 exceptionally talented individuals, including more than 20 active members, embodies the spirit of dedication and collaboration that drives our success. Each member brings a unique set of skills and expertise, contributing to a culture of innovation and excellence. Their unwavering commitment and multifaceted capabilities are the bedrock of our achievements and the driving force behind our future endeavors.

Dreams of Bangladesh is not merely a company; it is a trans-formative movement with a clear and compelling mission. We are dedicated to revolutionizing industries through cutting-edge technologies, empowering individuals to reach their fullest potential, and positioning Bangladesh as a global leader in the technological realm. Our vision extends beyond mere participation; we aim to set new standards, drive sustainable development, and create a

Smart
Bangladesh by 2041.

Our commitment to bridging the digital divide, fostering technological literacy, and promoting ethical and sustainable practices underscores our dedication to creating a positive and lasting impact. We align our efforts with the UN Sustainable Development Goals, ensuring that our innovations contribute to a more equitable, sustainable, and prosperous future for all.

As we continue to push the boundaries of what is possible, we remain steadfast in our mission to build a thriving tech ecosystem, enhance global collaborations, and drive social impact. Dreams of Bangladesh is poised to lead the charge in shaping a technologically advanced world where innovation knows no bounds. Our journey is far from over; it is an evolving story of ambition, achievement, and the relentless pursuit of excellence.

We invite you to be part of this trans-formative journey—join us as we continue to redefine the future of technology and set a new benchmark for success. Together, we will forge ahead, breaking new ground, inspiring future generations, and making Bangladesh a beacon of technological innovation and progress on the global stage.
